GORE® Gasket Tape Series 500

Creep resistant 100% ePTFE form-in-place gasket tape saves you time, money and trouble

We are happy to offer you, a valued (Distributor Name) customer, a gasket tape that provides exceptionally creep resistant 100% ePTFE form-in-place gasket that delivers a worry-free sealing performance for large diameter steel flanges. It also eliminates the cost associated with the waste when a gasket is cut from a sheet material.

GORE® Gasket Tape Series 500 is designed to maximize the operational reliability and safety of large (typically >24"), and/or non-standard steel flanges, especially those with thermal cycling. Applications for use include: vessel and tank process flanges & manways, large diameter piping, heat exchangers, baffles, columns and mixing tanks, reactors, towers, and turbines.

Please feel free to reach out to (contact name) at (contact phone number) or (contact email) if you have an application for which you would like to explore the use of this form-in-place gasket material.

Click on GORE® Gasket Tape Series 500 for more technical data about this product. (or suggest link through distributor website, and then to GORE)
