

(Distributor Logo)

Dear (customer),

We appreciate your business, and for the continued opportunity to offer a variety of quality products, and information that will meet your gasketing needs.

With a focus on quality, we are happy to offer you a highly conformable gasket that seals irregular surfaces, leveraging your ability to standardize across process piping.

Using **GORE® Universal Pipe Gasket (Style 800)** across multiple pipe flange materials and process media reduces the process safety and production downtime risks from the use of an incorrect gasket material.

Made from 100% expanded PTFE, the Gore® Style 800 Gasket is...

- chemically inert
- temperature and blowout resistant
- dimensionally stable
- seals at the lowest bolt load
- resists creep and cold flow (relaxation)

The unique design allows for the lowest stress-to-seal for applications in the most fragile plastic and glass lined flanges.

Click on **GORE® Universal Pipe Gasket** for more technical information about this product. (or suggest link through distributor website, and then to GORE)

Contact (contact first, last name) via phone (contact phone) or email (contact email) with product questions or inquiries.

Thank you for your continued support!
