¹ The electrical specifications in this table are based on a 0.91 m (36 in) assembly length and maximum frequency with straight connectors.

² Cable is wrapped 360° around a 57 mm (2.25 in) radius mandrel.

³ Per MIL-STD-1344, method 3008.

⁴ When bent ± 90° at a radius that is twice the minimum bend radius, test assembly performs reliably through the stated flex cycles.
