

Packaging Vents

Why choose GORE® Packaging Vents?

	Competitive Vents	GORE® Vents	Gore Benefits
Airflow			<i>100 % inline Airflow inspection ensures consistent product performance and quality</i>
Water Entry Pressure			<i>Gore's unique membrane structure in combination with the high quality integration process leads to repeatable water barrier properties</i>
Leakage protection against challenging liquids			<i>Unlike competitive products, the unique GORE™ Membrane is proven to be more effective at protecting containers from hazardous leaks, reducing the risk of harm to people and the environment</i>
Reliable venting after liquid contact			<i>Unlike competitive products, the roll-off optimized GORE™ Membrane ensures fast venting recovery even after exposure to challenging fluids, to avert container bloating or collapsing</i>

- More than 20 years of packaging applications expertise, from Gore – inventor of the ePTFE membrane.
- As an expert throughout the whole supply chain, we are able to share application insights to support our customers.
- With our 100 % inline inspection, we are reducing the risk of product failures to an absolute minimum.

- An individual laser code on each product enables full product traceability and helps us and our customers to keep processes safe and transparent.
- Gore manufactures and controls all raw materials, intermediates as well as the integration process. This makes us independent and reliable in terms of both product quality and product availability.
