

SHADE SAILS MADE FOR LIFE AND LIFESTYLE

With a passion for designing and building beautiful outdoor living spaces, Tenshon® excels at creating shade sails that enhance quality of life.

To match their high quality standards, Tenshon long ago selected GORE® TENARA® Sewing Thread for use in every sail shade they manufacture.

"I have tensile structures that were built twelve years ago and have never had an issue with the TENARA Sewing Thread. I've even had structures survive a hurricane, with no impact to the thread," says Matthew Dickerson, CEO and Owner of Tenshon, LLC.

Tenshon knows TENARA Sewing Thread is engineered to outlast the fabric in which it is sewn. That's why Tenshon uses GORE TENARA Sewing Thread to create the highest quality products.

TENARA® Sewing Thread is the perfect match for shade sails – it remains strong after prolonged UV exposure, resists mildew, and is chemically resistant to cleaning solutions.
