

GORE® GFO® Fiber

Seal of Assurance Program

QUALITY ASSURED WITH GORE “SEAL OF ASSURANCE PROGRAM”

Many PTFE/Graphite packings are available in the market. While they may all look the same, it is worth noting that there are huge inconsistencies in the actual product quality and performance of many of the packing solutions offered.

The installation of these products can increase operating costs (power, water, maintenance) and risk of premature failure as well as unscheduled shutdown. Such problems can cost a lot of time and money. But since packings look alike, how can your company avoid this? To help, Gore created the Seal of Assurance Program.

Through a global network of authorized braiders, this program ensures that every fiber used to braid the packing is a GORE® GFO® Fiber. Look for the 100% GFO® seal on the box and print right on the packing – it's the only packing that is identified this way!

- Packing imprinted with “100% GFO®” – proof of authenticity
- GFO® Fiber sticker on the packaging
- No blends of other material
- Consistent quality of material
- Quality assurance through audits
- Global network of authorized and trusted braiders
- GFO® Fiber – Made in America
